DETAILED ACTION

Election/Restrictions

On August 15th 2002 I spoke with Thomas J. Perkowski concerning this election/restriction issue. A preliminary amendment was to be faxed to the office concerning claim cancellation. To date that preliminary amendment was not received by the office. Consequently, restriction to one of the following inventions is required under 35 U.S.C. 121:

- (A) Claims 1-4 and 13-38 disclose an internet-based information system comprising an IP-based network connected to the infrastructure of the Internet by way of an IP-based router
- (B) Claims 5-12 and 40-43 disclose an Internet-enabled bar code driven consumer product information kiosk having embodying e-mail messaging capabilities.
- (C) Claim 39 discloses a retail-based system for installation in retail stores comprising a subsystem of shelves for supporting one or more UPN-encoded products.

Inventions (B) and invention (A) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention as defined by Group (B) has separate utility as defined by Group (A). For example, Group (B) claims an Internet-enabled bar code driven consumer product information kiosk

having embodying e-mail messaging capabilities. See MPEP § 806.05(d). The limitation claimed in Group (B) are not linked or related to those limitations disclosed in Group (A).

Inventions (B) and invention (C) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention as defined by Group (B) has separate utility as defined by Group (C). For example, Group (B) claims an Internet-enabled bar code driven consumer product information kiosk having embodying e-mail messaging capabilities. See MPEP § 806.05(d). The limitation claimed in Group (B) are not linked or related to those limitations disclosed in Group (C).

Inventions (C) and (A) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention as defined by Group (C) has separate utility as defined by Group (A). For example, Group (C) claims a subsystem of shelves for supporting one or more UPN-encoded products. See MPEP § 806.05(d). The limitation of the computational system for enhancing the process of e-commerce claimed in Group (C) are not linked or related to those limitations disclosed in Group (A).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
